Feature and Benefits

- Pocket design
 - Flared fork entry on front of pockets to guide forks
 - Integrated non-step top slope
 - Integrated top/bottom gusset at rear of pocket to prevent damage during dump operations
 - Fully welded pockets extending life cycle of container
- Rounded bumpers smoothly aligns forks to pockets
- Floor channels capped both front and rear to eliminate rocks entering channel causing damage to trucks
- Interlocking top channel design adds strength extending life cycle of container
- Interior of container body is welded solid to prevent leakage and increase strength of container
- Nestable designs standard on 2-4 yard models to minimize freight cost and storage space requirements
- 6-8 yard sliding door flat models
- Front channel welded solid inside to prevent spillage and streaking on front of container during dumping operations
- Safety decals and corner reflectors installed on all units prior to delivery
- Containers fully primed with exterior painting to prevent premature rusting
